NOTES:

- Systems worksurfaces can be used with all Voi components.
- Worksurfaces are abrasion- and stain-resistant laminate over durable 1½" solid core high performance particleboard: resists warping.
- One flat bracket ships with each worksurface.
- Square edge detail.
- When using a floating modesty panel or an external channel under the worksurface, the depth clearance for keyboard trays and center drawers decreases by 8".
- ! When using a worksurface as a bridge, no additional supports are needed. One support is required for returns, two supports are required for desks and credenzas.
- ! Depending on your support combination, an external channel may be required for extra support on unsupported spans greater than 54"W.
- ! If using a 54"W or 60"W floating modesty, it is not necessary to spec an external channel.
- ! When attaching worksurfaces to panels, one or more of the following are required: anti-dislodgement brackets, end panel, support leg and/or cantilevers. Cantilevers and anti-dislodgement brackets must be ordered separately when attaching worksurfaces to panels.
- ! A return worksurface is considered 48"W or shorter. Longer returns cannot be supported by a flat bracket only.

(available kneespace - book basket/box height = usable kneespace)

(10" available kneespace - 5" basket height = 5" usable kneespace)
